Todd,

Yes, can you please add that to the landscape exhibit? Thanks!

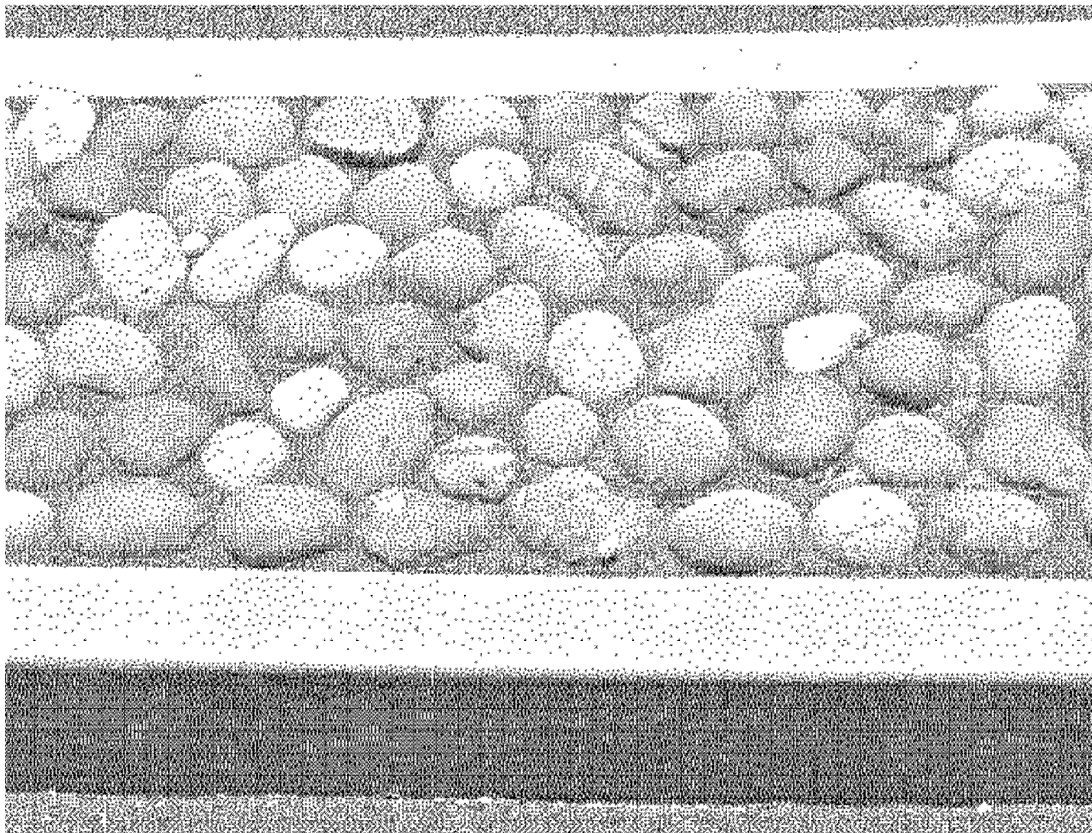

Doug E

Doug,

This is the cobblestone on Jeronimo that is being proposed as the hardscape. Is this what you are requesting a picture of?

Thanks!

Doug,

Will do. Adding Todd and the CDPC team to help with this request.

Todd/Matt – see below. Can we get the updated and sent back on this email chain?

Thanks!

David,

Thanks for following up. Could you please add a picture showing the proposed hardscape (that hopefully matches the existing hardscape of the existing islands)?

Doug

Doug,

Checking in on the landscape concept to make sure we are not anticipating any major changes/requests? I will be submitting the LS plans to you on a separate timeframe than the plans so as not to hold anything up, so no worries on the timeline but want to make sure I stay in front of you now that the concept has been sent off.

Thanks!

Subject: El Toro Medians

Doug,

Please find attached a landscape exhibit for your use. The plant palette and configuration/layout is based on the existing landscaped medians on Jeronimo, just south of El Toro, and was also the basis for the cost estimate provided previously.

Thanks!

Hi Todd,

Per our conversation earlier, please see attached PDF of the revised Landscape plan with plant imagery. Let us know if you have any questions or concerns.

Thank you

Matt,

I talked to David and he indicated that City staff wants to continue with landscaping the medians. They just want to show their management and maintenance a plant pallet. Can you add some pictures from either your

R002450_0000033

library and/or a representative photo of what is out there on Jeronimo (which was the basis for the preliminary planter layout) and add it to the attached Exhibit you already prepared. Google Earth might be okay, but probably something a bit better than this? If I had photoshop skills, I'd just edit the arrows out!

Thanks!

Subject: [External] El Toro Medians

Good Friday afternoon gentlemen.

Attached is our estimate.. and an exhibit to show how it works. There are some items that aren't covered on the estimate..

- AC paving sawcut, removal and patch for irrigation crossings to medians
- Power for a new controller we're proposing for the median section between 2nd and Pino Lane. Also we found an empty meter box with a meter connection in the same area which is good since there's no City landscape and irrigation for that area to connect to. We assumed this could be used and a new meter installed..

Please take a look and maybe you'd want to connect to review what we would propose and get your thoughts and input. Once we discuss and finalize, we can send the excel file for your use.

Let me know when you can.

Thanks a lot.
